6. True or False?

Let p be the discontinuous function

$$p(x) = \begin{cases} 1 & \text{if } x < 2 \\ 3 & \text{if } x \geq 2 \end{cases}$$

There is a continuous function y , defined on all real numbers and differentiable everywhere except $x = 2$, such that

$$y' + p(x)y = x \text{ and } y(0) = 1.$$
